CUSTOMER CHURN ANALYSIS – BUSINESS INSIGHTS

KEY FINDINGS AND BUSINESS RECOMMENDATIONS

No.	Area	Key Finding	Business Recommendation
1	Contract	Month-to-month customers have the highest churn rate (42.71%), while two-year customers have the lowest (2.83%).	Offer discounts and incentives to encourage customers to choose long-term contracts.
2	Tenure	Customers with 0-12 months tenure have the highest churn rate (47.44%).	Provide better onboarding, early support and special retention offers to new customers.
3	Payment Method	Electronic check users have the highest churn rate (45.29%), while automatic credit card users have the lowest (15.24%).	Encourage automatic payment methods through incentives and convenient payment options.
4	Internet Service	Fiber optic customers have the highest churn rate (41.89%), while customers without internet service have the lowest (7.40%).	Investigate fiber optic pricing, service quality and customer complaints.
5	Tech Support	Customers without tech support have a higher churn rate (41.66%) than customers with tech support (15.17%).	Promote technical support services and provide proactive assistance.
6	Senior Citizen	Senior citizens have a higher churn rate (41.68%) than non-senior customers (23.61%).	Provide personalised assistance and accessible customer support for senior customers.
7	Gender	Female customers have a slightly higher churn rate (26.92%) than male customers (26.16%).	Monitor customer feedback and improve services without assuming gender is the cause of churn.
